

sealed connectors for multiple wires

in-line butt connectors

join two wires to one wire

- color dash on tubing indicates the wire gauge for the connector
- replaces temporary, unsealed Quick-Taps
- color stripes on the connector indicate which crimp die to use
- tubing has an active adhesive that seals between multiple wires

closed-end connectors

join two to four wires

- tubing has an active adhesive that seals between multiple wires and eliminates wire pull-out
- closed-end connectors can replace wire nuts in environments where corrosion is a problem.

easy to install

1 strip wires & insert

2 crimp it

3 heat it

4 seal it

problem:

existing methods

solution:

sealed multiple wire connections
